

ALOK T V

Full Stack & Backend Engineer

Bengaluru, India • +91 6362117360 • aloktvalok@gmail.com • [linkedin.com/in/alok-tv-2301ba237](https://www.linkedin.com/in/alok-tv-2301ba237) • github.com/ALOKTV

SUMMARY

Full Stack Engineer with 3 years of experience building scalable backend systems, REST APIs, and databases. Proficient in Node.js, TypeScript, Supabase (PostgreSQL), Firebase, and React.js. Hands-on experience with CI/CD pipelines, database migrations, A/B testing, Row Level Security enforcement, and delivering clean, production-grade code in collaborative Agile teams.

TECHNICAL SKILLS

Backend: Node.js, TypeScript, REST APIs, Supabase (PostgreSQL), Firebase, Row Level Security (RLS)

Frontend: React.js, Redux, HTML5, CSS3, Vite, Responsive Design

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL

Tools & DevOps: GitHub Actions (CI/CD), Git, Postman, Jira, BigQuery, GrowthBook, Periscope, Android Studio

EXPERIENCE

Software Engineer — Chimple Learning (CUBA App)

Bengaluru | 2022 – Present

- Led Firebase → Supabase (PostgreSQL) database migration, improving backend scalability and enabling complex relational data querying.
- Built WhatsApp chatbot flows using WhatsApp Business APIs for automated user messaging, notifications, and engagement.
- Migrated build system to Vite, significantly reducing build times and improving overall developer workflow efficiency.
- Ran GrowthBook A/B experiments to analyze feature performance and drive data-informed product decisions.
- Implemented Redux state management across the codebase, ensuring predictable application state and improving maintainability.
- Maintained GitHub Actions CI/CD pipelines; collaborated in Agile sprints via Jira and GitHub PRs for timely feature delivery.
- Enforced Row Level Security (RLS) policies and led code reviews to uphold clean code, naming conventions, and documentation standards.
- Designed reusable, modular backend architecture patterns that reduced developer onboarding time and improved long-term scalability.
- Generated data insights using BigQuery and Periscope to support product decisions and monitor application performance metrics.

PERSONAL PROJECTS & OPEN SOURCE

Crysta — Personal AI Agent | Java · REST APIs · AI Integration

- Building a voice-enabled personal agent that answers questions and automates tasks such as setting alarms, playing music, and web search.
- Integrated AI APIs for natural language understanding; managed secure API credentials using environment-based .env configuration.

Automatic Textile Stain Detection | Python · YOLOv5 · Computer Vision

- Developed a YOLOv5-based computer vision model for automated fabric defect and stain detection in textile manufacturing pipelines.
- Built end-to-end ML pipeline covering data preprocessing, model training, and inference to flag defects with high accuracy.

Job Search Dashboard | JavaScript · Node.js · REST APIs

- Aggregated job listings from multiple platforms with filters for skills, experience, and location using a Node.js backend.
- Designed modular, reusable backend architecture to allow seamless integration of additional job platforms in the future.

EDUCATION

Bachelor of Computer Applications (BCA)

2022

S R Nagappa Shetty Memorial National College, Shivamogga, India
